

white.

1618.

A new Almanacke, and Prog-
 nostication, for the yeare of
 our Lord God
 1618.

Being the second after 3 Leap yeares.
 Composed for the Meridian of the
 most honorable City of London,
 and will serue generally for
 the Monarchie of great
 Brittain.

By Iohn White, Mathematicks.
 To William to the

Genesis. 1. 14.
 God said, let there be lights in the
 Firmament of the Heauen, to se-
 perate the day from the night; and
 let them bee for Signes, and for
 Season, and for dayes and yeares

Printed at London for the Com-
 pany of Stationers.

The begining and ending of the Termes, with
their returnes, this present yeare,

1618.

Hillary Terme. beginneth the 23. of Ianuary, and endeth
the 12. of February. and hath 4. returnes.

{ Octab. Hillar. }
{ Quind. Hillar. }

{ Craft. Purifi. }
{ Octab. Purifi. }

Easter Terme beginneth the 22. of Aprill, and endeth
the 18. of May. and hath 5. returnes.

{ Quind. Pasch. } { Mens. Pasch. } { Quinq; Pasch }

Take	Comits,	The moone or signes in	♈.m.♊.
	Glisters,		♋.♌.♍.
	Gargarismes		♎.♏.
	Preparatiues,		♐.♑.♒.
	Stop Remmes & Fluxes		♓.♈.♉.
	Purged by Sweating,		♊.♋.♌.

Fitt time for Blood letting.

Let blood the Sanguine, from ♀ new moone to ♀ first quarter
The Cholericke, from the first quarter to the full.
The Flemmatick from the new moone to the last quarter.
The Melancholy from the last quarter to the new moone.

Dangerous times for Blood letting.

It is dangerous to let blood in the heats of Summer, or cold of Winter, and when the moone is in that signe which governeth that part of the body you would let blood. Likewise within two dayes of the change, or full of the moone, it is not to be done without very urgent cause, as the Apoplexie, Quinancie, or such violent maladies.

The Anatomic of Mans body, as the partes
thereof are governed by the Moones passage
through the twelve Signes of the
Zodiacke.

Aries head and face,

Taurus.
Necke and
throat.

Cancer
Brest stomach
and ribs.

Virgo
Bowels and
belly.

Scorpio
Secret mem-
bers.

Capricornus
The knees.

Gemini.
The Armes
& Shoulders.

Leo.
Heart and
backe.

Libra.
Reynes and
loynes.

Sagittarius.
The Thighes.

Aquarius.
The Legges.

Pisces, The Feele.

[The fiery Ram, doth rule the head and face,
In necke and throte, the Bull doth challenge place,
The aylie Twins, doe rule both armes and hands,
The brest and stomacke, Cancer the commands:
The lusty Lyon hath the backe and heart,
Bowells and belly, is the Virgins part:
In loynes and reynes, is Libras liberties,
The Scorpion rules the stones, and privities:
The thighes and hanches, doth the Archer claime,
And Capricorne oft p[ro]p[ri]es the knees to paine.
Aquarius makes the legs much aches feele,
And Pisces rules the ankles, feet and heele.

January hath xxxi. dayes.

Warme meates and cloathes this Month are good :
Take heed of Bathes, and letting blood

1 day, Sun riseth at 8, & 4, min. Sets at 3, & 50, min.

6 day, Sun riseth at 7, & 40, min. Sets at 4, & 20, min.

White. 1618.

*A Prognostication, for
this yeare of our Lord
God. 1618.*

Being the second after Leape yeare.

Wherein is conteyned the estate of the whole
Yeere, the disposition of each Quarter, and
the inclination of the weather for euery
Quarter of the Yeare through-
out the whole yeere.

Together with the rising and setting of the Planets,
and the good and euill dayes for each Moneth of
the yeere: with Husbandry aduertisements,
and other thinges fitte to be knowne,
both pleasant and profitable.

By Iohn White, wel-willer to
the Mathematickes.

Imprinted at London for the
Company of Stationers.

1618.

**A brieft Computation of time compleat
within this present year 1618.**

F rom the Creation of the World vntill this present year, are contained of years.	5580.
From the Creation vntill the generall Deluge.	1658.
From the Creation of the World vntill Christ.	3969.

Since the beginning of the raigne of our King JAMES the first of England, compleat in March the 24. is 15. yeares, but current 16. yeares.	15. 16.

A Declaration of the Disposition of the foure Quar- ters of this yeare. 1618.

And first of Winter.

Sol in Capricorne,

Aquarius,

Pisces.

THE Winter Quarter doth take his beginning at the very time of the Sunnes first entrance into the first degree of Capricorne, (which will be vpon the xii. day of December) and doth so continue till the Sunne doth passe through these three winterly Signes Capricorne, Aquarius, & Pisces: and then this Quarter endeth vpon the tenth day of March.

This Quarter by his naturall inclination is cold and moyst, of complexion Phlegmaticke: which Element doth most pre dominate dayly from thye of the clocke after noone, till ix. of the clocke at night. Now doth the Seas swell by reason of the Winds outrage. Floods are at highest, Ayre coldest, Dayes shortest, Nights longest, and all Creatures most feeblest. The poares of the Earth are inclosed and shut vp by reason of the extremitie and coldnesse of the Ayre. Birds of the ayre pine, Beastes of the field droupeth; and the Fishes conuerty to the deepest of y waters for most com-

A Prognostication.

foze. Such things as the chearefull Sommer doth produce and nourish, the Winter doth bitterly destroy. It is necessary that wee for our health, now vse such Meates whose natures are warme & dry: Now are the outward parts of the body much weakened by the coldnesse of the Ayre, and naturall heat is driuen into the inward parts of the body, to comfort the vitall Spirits, and to helpe Digestion: Therefore seeke to expell the coldnesse of the Ayre by warme Drinckes, strong Wines, and comfortable Broths: Keepe also thy Head & Feet from cold & wette for feare of future danger; yet now will the body digest more grosse & strong Meates then in Sommer, by reason of the inward heat.

The Diseases like to be most rife this Quarter, are Rheumes, Toothach, Cramps, sore Eyes, Goutes, Paines, Coughs, Coughs, diuers sorts of Agues, Cathars, Pluries, &c.

Of the second part of the yeare, called the Spring.

Sol in Aries,

Taurus,

Gemini.

The Spring taketh his beginning when as the Sunne doth enter into the first degree of the first Equinoctiall Signe Aries, (which is on the tenth day of March:) and doth so continue till he passeth through these three vernal Signes Aries, Taurus, and Gemini: which Quarter doth end vpon the first day of June.

The

White. 1618.

The naturall quality of this Quarter is to be hotte and moist, and is of the Sanguine complexion; which Element hath daily predomination from ix of the clocke at night to thre of the clocke in the morning. The dayes are now equall in length to the nights, and the cheerefull Sunne like a happy Messenger, brings good tydings of a forward Spring, giuing comfort to the sad Earth, and to all liuing Creatures: This is the most pleasant and holisome Quarter in the yeare, and greatly availeth to destroy Diseases of long continuance, and to preserve the body in health. The Fowles of the Ayre doe couple, the Beastes of the Earth doe multiply, & the Fishes of the Sea doe increase in multitudes, forsaking the deepe to line in shallower places. Now doth the Earth produce all holisome Plants for the vse of Man: Now we may vse somewhat smaller Drinkes then in Winter; but abate somewhat in eating: and take such things whose operation is cold and dry. This is the most convenient time to Purge, Sweat, Bath, and Bleed.

The Sickneses commonly attending on this Quarter, are Measels, Seabbes, small Pocks, Leproses, Phrysitis, Kings Cuill. &c.

Of the third part of the yeare, called Sommer.

Solin Cancer.

Leo

Virgo.

The Sommer Quarter doth begin at that time when the Sunne doth enter into the first degree of Cancer: which happeneth on the xiiij day of June, and doth hold while

A Prognostication,

he passeth through these three Signes Cancer, Leo, Virgo:
And this Quarter endeth upon the xxi day of December.

This Quarter is by nature hot and dry. of complexion
Chollerike: which Element ruleth from iii. of the clocke in
the morning, till ix. of the clocke before noone. The Wind
and Seas are (of the most part) calme: Heat is at the high-
est, and floods at the lowest: the dayes longest, and the
nights shortest. Fruite most delicate, and flowers most
pleasant. How doth the painefull Bee gather Honey, and
the toying Husbandman reapes some profit of his former
labours: Serpents leaues their Denes to come forth in-
to the warmth: Naturall heat is now dispersed into all
the outward parties of the body, and we are not so hot with-
in as in Winter, and our digestion is more feeble and weak: We
may drinke more Celer now, then in Winter, for it be-
small and coole; and like stoke of Meate doth best suffice
Nature, and such which is boyled is most holloine. And vse
such things which is of a cold and moist Nature.

The Sickneses like to reigne this Quarter, are fevers,
Pestilence, Pusches in the Face, Jaundies, grise in the Se-
cret parts, Apostumes, paine in the Eares, &c.

Of the fourth part of the yeare,
called *Autumne*, or *Haruest*.

Solin Libra,

Scorpio,

Sagittari.

A Vumne, or Haruest, (called usually, the Fall of the Lease) ca-
keth his beginning when the Sunne doth enter into the first
degree of Libra, (being now seated in the second Equinoctiall)
and

VWhite. 1618.

and doth continue whilst hee maketh his progresse through these three Signes Libra, Scorpio, and Sagittari: which Quarter doth end on the twelfth day of December.

This Quarter naturally is cold and dry, participating of the Melancholy complexion; which Element hath gouernance from ix. of the clocke in the morning, till xii. in the after noone. Now are the dayes once againe equally ballanced with the nights: Corne is reaped, Grasse mowed, Fruites gathered, the Leaues fall, and the face of the Earth loseth her former beauty: Springs are at lowest, and Floods at the highest: Beastes seek them a shelter against the ensuing Winter, and Serpents beake them to their Caves. This Quarter of all the other, is the most unholsomest, and is more subject to Sicknes then any: Therefore beware of the morning and evening cold.

The Diseases incident to vs this Quarter are these, and such like, as paine in the Backe, Bladder, and Kidnies; the Splene, Cancers, Fluxes of Blood, Agues, Melancholy, Blindnesse, Fistulaes, Falling sicknesse, &c. From which, let vs pray to our most gracious God, to preserve and bleesse vs. Amen.

Of the Eclipse happening this yeare. 1618.

There will be an Eclipse this present yeare 1618. and that is of the Sunne, and doth happen upon the xi. day of July 49. minutes after xii. of the clocke in the evening, being Saturday.

The

A Prognostication

The rising and setting of the Planets, with the
disposition of the Weather for euery Quar-
ter of the Moone; together with the good and
euill dayes, throughout the whole yeare.

Of Ianuarie.

The Explanation of this Table
for this year. 1618.

NOte that Saturne is in Taurus (all this yeare) from the first of January to the xxviii. of May: which doth shew, that we shall be subiect to many infirmities of the Heart, Brest, and Belly. Then from the xxviii. of May all the rest of the yeare, Saturne is in Gemini: which sheweth much paine in the Belly and Heart, &c.

Iupiter is in Aquarius from the beginning of this yeare till the vi. day of Aprill: which sheweth sickness in the Feete, Armes, Shoulders, and Brest. Then from the vi. of Aprill to the iii. day of September, he is in Pices. Then from the iii. day of September to the xx. day of November, he is againe in Aquarius. And then from the xx. of November to the end of the yeare, he is againe in Pices.

Mars

A Prognostication:

Mars is in Aquarius from the beginning of the yeare, till the first day of February; which sheweth paines of the Breast, Legges, and Hart. From the first of February to the r. of March, he is in Pisces. From the r. of March to the xix. of Aprill, he is in Aries. From the xix. of Aprill to the last of May in Taurus. From the last of May, to the xxi. of July in Gemini. From the xxi. of July, to the xxvi. of August he is in Cancer. From the xxvi. of August to the xv. of October in Leo. From the xv. of October to the xiii. of November he is in Virgo: and all the rest of the yeare he is in Libra.

As for the place of the Sunne, you shall finde it in the Kalender set downe in red letters, amongst the Saintes dayes neere the middle of every Month.

Venus is in Sagittarie from the beginning of January till the viii. day of the same month; which sheweth paines in the Shoulders, Armes, Secrets, and Thighes. From the viii. of January to the first of February she is in Capricorne: from the first of February to the xxv. of the same month she is in Aquarius. From the xxv. of February to the xxii. of March she is in Pisces: from the xxii. of March to the xv. of Aprill she is in Aries: from the xv. of Aprill to the r. of May she is in Taurus: from the r. of May to the ii. of June she is in Gemini: from the ii. of June to the xxviii. of the same month she is in Cancer: from the xxviii. of June to the xxi. of July she is in Leo: from the xxi. of July to the xvi. of August, she is Virgo: from the xvi. of August to the r. of September she is Libra: from the r. of September to the xiii. of October she is in Scorpio: from the xiii. of October to the last day, in Sagittarie: from the last day of October to the xxv. of November she is in Capricorne: from the xxv. of November to the xxvi. of December, she is in Aquarius: the rest of the Month in Pisces.

Mercury is in Capricorne from the first day of January to the ix. of the same month: from the ix. of January to the xxv. of the same month in Aquarius: from the xxv. January to the xiii. of Aprill he is in Pisces: from the xiii. of Aprill to the xxi. in Aries: from the xxi. of Aprill to the vii. of May in Taurus: from the vii. of May to the xxiii. in Gemini: from the xxiii. of May to the last of July he is in Cancer: from the last of July to the xvi. of August in Leo: from the xvi. of August to the ii. of September in Virgo: from the ii. of Sep-
tember

tember to the xxi. day : from the xxi. of Sept. to 3. rebll. of November in Scorpio from the xxi. of November to the xv. of December in Sagittary : from the xv. of December to the end, in Capricorne.

As for the Moones entrance into the Signes, you haue their Knetolls in the Kalender, ordinarily placed against eury day of the Month. &c.

Note that the chiefe significators of sicknesses, are Saturne & Mars.

*Elections of the right learned Doctor Claud. Dariott
shewing the nature and proprietie of the Moode
in her passage through the Zodiack.*

Aries, is good to conferre with Wighty men, and Rich men : Begin that which you would soone end : and it is a good time to diminish Fleame.

Taurus, Begin that which you would haue continue, Build, buy Dowry, good for pleasure, and Marriage.

Gemini, Put Children to Schoole : but beware of Winters, and opening of the Aines.

Cancer, Good to Journey, and to take Electuaries : it is a fitt time to diminish Chollic.

Leo, Begin that which you would haue knowne & esteemed : Put on new Apparell, and amoyde Clothes.

Virgo, Send Children to Schoole, let the loue of Virgins : but it is euill to Marry, for the Woman then married, will haue few or no Children.

Libra, Good to Journey, vse no Auerie, Buy and Sell, and good to diminish Melancholy.

Scorpio, Begin no good thing at all, because it is a signe of fallenesse and deceipt : yet good to vse Drugges in Potions for Phisicke.

Sagittari, Use Exercise of the body, as Shooting, Running, &c. Conferre with Lawyers about thy business : it is good to diminish Fleame.

Capricorne, Conuerse with Old men : it is good to Till ground, or to plant Vines, or sow Seedes, and to make Gardens.

C

Aquarius,

A Prognostication.

The Moone in **Aquarius**, It is good to lay Foundations of Houses, Cities, or Buildings; Plant Trees or Cloysters: good to diminish Melancholy. **Pisces**, Good to Angles, or to use Fishing nettes: take Drugges, or Druticke in Poles, and it is good to diminish Chollicke.

How to iudge what Weather will follow, by the rising and setting of the Sunne.

The Sunne rising bright and cleare, signifieth a pleasant day: If he rise fiery red, it promiseth raine: If in his rising he be thinly surrounded with a cloude, it betokeneth foule weather: If the Sunne come the cloude be opposite to the West, it signifieth faire weather: If at his rising there appeare a circle about him, & vanisheth away equally, it betokeneth faire weather. Also, if he set with red, it signifieth faire weather: If at his setting he be of diuers colours, or cloude like water, it threatneth raine. If at the rising of the Sunne, his beames seeme red, or long, or compassed with red cloude, it signifieth great winds: If at his setting there appeare a thicke myste, or if it raineth in the evening, it threatneth very foule weather to follow. Also, if the Sunne beames be spotted either greene, pale, or blacke, gathered to a cloude, it signifieth raine. The Sunne setting cleare without any cloude, signifieth a faire night to ensue. If the circle, or circles about the Sunne be cleare, & of no continuance, looke for faire weather: If there be many circles, it signifieth winds: the redder they are, the more vehement the winds. If the circles are here and there broken, and are thicke and blacke, looke for cold wind, or snow: Or, if he setle behind a great blacke cloude, raine followeth.

How weather is foreknowne by the Moone.

If the Moone in the third day of her change, or three dayes before her full, or in the middle of the quarter, be found of pure light nothing encompassing her, she ends direct by the promise of faire weather: but being so red colour, promoketh winds. The Moone pale, or somewhat backe, or thicke, threatneth raine. When the Moone is five dayes old, make the toppes of her horns, if they be blunt, it signifieth

signifieth raine: if sharpe pointed and pich'ng upwards, great winds. If in the fourth day after her change, shee haue a red circle about her, it signifieth winds and raine.

Of the Iudgement of the weather by the Starres,

If the Starres appeare of much light, and seeme to be of more bignesse & blazing then ordinary, it betokeneth great winds and moysture in that part where they seeme so: and in Winter, great frostes. When diuine Starres appeare with long fiery tayles, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also, when Starres seeme to shoot or fall, it signifieth great winds in that place: If they seeme to shoot in diuers places, it signifieth diuers winds: If in all places, winds, thunder, lightning, and most tempestuous weather.

**A short Instruction, and very necessarie to know
the times and seasons when to Sow, and replant
all maner of Seedes for the Garden.**

Sow Cabbages in Februarie, March, or Aprill, in the decline of the Moone: and replant them in the Decrease.

Sow Cabbage-Lettuce in Februarie, March, or Iuly, in the old of the Moone.

Sow Onions and Leekes, in Februarie or March, at the decline of the Moone.

Sow Beets in Februarie or March, at a full Moone.

Sow Coleworts white & Greene, in the middle of August or September: Plant the young ones in October, and let them abide in November.

Sow Parsneps in Februarie, Aprill, or Iune, in a fayre day.

Sow Radish in Februarie, Aprill, or Iune, in the increase of the Moone.

Sow Pumpions, Colcumbers, Miltons, and Courdes, in February, March, or Iune, in a hotte and fayre day.

Sow Spinage in Februarie or March, in the old of the Moone.

Sow Parsley, Fenell, and Anno-seed, in Februarie or March,

A Prognostication.

- at the full of the Moone.
 Sow white Cicory in February, March, July, or August, in a full Moone.
 Sow Cardus-benedictus in February, March, or May, when the Moone is old.
 Sow Basil in March, in an old Moone.
 Sow Burclaine in February, or March, in the increase of the moone.
 Sow Marg-ran, Clovers, Tyme, Flower-gentle, Rosemary, & Lavender, in February, March, or Aprill, in the increase of the Moone.
 Sow Garden-cresses, and Rocket, in February, at the increase of the Moone.
